What did you especially like about the course?

instructor showed a lot of effort

Very involved and motivated TA.

That there had been the possibility of small groups.

Lomys was very approachable and put in a lot of effort and went over every single problem to the best of his ability. You could tell he cared.

The TA was very helpful

He was a great TA and was really friendly. He explained every theorem clearly and tried to give as much intuition as possible. The best TA I had.

Niccolo Lomys was very well prepared and tried really hard to make the difficult topics understandable for everyone. Besides, he also wanted to give additional lessons in his spare time (for all students).

Niccolo was a very good TA!!

What could/should be improved?

- room size was too small - solutions should be printed beforehand and thus, the exercise session would leave more room for understanding and discussion

Too many exercises for the given time and it was hardly possible to prepare the exercises (time and difficulty)

It was a bit of a whirlwind, would rather have learned a little bit less but more in depth, more real life examples

He should be more than a TA and he should in fact teach this course.

some standardised notations between the lectures and tutors. Handwriting can be improved but not all too bad. Overall, very content.
