1. Course Evaluation

^{1.14)} What did you especially like about the course?

- Extremely determined and well prepared TA. Good problem sets and nice solutions, as well as some interesting discussions.
- It was very well noticeable that the TA put a lot of effort into this class. Thanks a lot for this!
- Niccolo was an outstanding teacher. Very good tutorials, very good handouts, very detailed grading of homeworks, great availability.

^{1.15)} What could/should be improved?

- I think for people without a background in measure theory (like me), it would have been helpful to cover more of the medium and easier questions during the TA's instead of the very tough ones.
The introduction of "expectations" in this course (by which I mean lecture and TA together) was messy and confusing.
- Some discussions were too long such that valuable time for the problem got lost. Solutions were presented in a exhaustive way, which is good for written solutions but in the sessions time got lost for the other questions.
